Developmental Health and the Wealth of Nations: Social, Biological, and Educational Dynamics Carl Bereiter, Camil Bouchard, Pia Rebello Britto, Jeanne Brooks-Gunn, Robbie Case, Christopher L. Coe, Max S. Cynader, Greg J. Duncan, Barrie J. Frost, Sharon Griffin

Probing the effects of the social environment upon human development, this volume asks how we can best support the health and well-being of infants and children in an era of rapid economic and technological change. The book presents cogent findings on human development as both an individual and a population phenomenon. Topics covered include links between socioeconomic status, achievement, and health; the impact of early experience upon brain and behavioral development; and how schools and communities can develop new kinds of learning environments to enhance adaptation and foster intellectual growth.

Synthesizing developmental, biological, and social perspectives, this volume will appeal to a broad interdisciplinary audience.
