Challenges and Solutions for Climate Change (Green Energy and Technology)

Wytze van der Gaast, Katherine Begg

Challenges and Solutions for Climate Change (Green Energy and Technology) Wytze van der Gaast, Katherine Begg

The latest scientific knowledge on climate change indicates that higher greenhouse gas concentrations in the atmosphere through unchecked emissions will provoke severe climate change and ocean acidification. Both impacts can fundamentally alter environmental structures on which humanity relies and have serious consequences for the food chain among others. Climate change therefore poses major socio-economic, technical and environmental challenges which will have serious impacts on countries' pathways towards sustainable development.

As a result, climate change and sustainable development have increasingly become interlinked. A changing climate makes achieving Millennium Development Goals more difficult and expensive, so there is every reason to achieve development goals with low greenhouse gas emissions. This leads to the following five challenges discussed by *Challenges and Solutions for Climate Change*:

1. To place climate negotiations in the wider context of sustainability, equity and social change so that development benefits can be maximised at the same time as decreasing greenhouse gas emissions.
2. To select technologies or measures for climate change mitigation and adaptation based on countries' sustainable development and climate goals.
3. To create low greenhouse gas emission and climate resilient strategies and action plans in order to accelerate innovation needed for achieving sustainable development and climate goals on the scale and timescale required within countries.
4. To rationalize the current directions in international climate policy making in order to provide coherent and efficient support to developing countries in devising and implementing strategies and action plans for low emission technology transfers to deliver climate and sustainable development goals.
5. To facilitate development of an international framework for financial resources in order to support technology development and transfer, improve enabling environments for innovation, address equity issues such as poor people's energy access, and make implementation of activities possible at the desired scale within the country.

The solutions presented in *Challenges and Solutions for Climate Change* show how ambitious measures can be undertaken which are fully in line with domestic interests, both in developing and in developed countries, and how these measures can be supported through the international mechanisms.

From reader reviews:

Bonnie Mentzer:

Book is to be different for every grade. Book for children until finally adult are different content. To be sure that book is very important usually. The book Challenges and Solutions for Climate Change (Green Energy and Technology) seemed to be making you to know about other understanding and of course you can take more information. It is rather advantages for you. The guide Challenges and Solutions for Climate Change (Green Energy and Technology) is not only giving you far more new information but also for being your friend when you truly feel bored. You can spend your own personal spend time to read your book. Try to make relationship together with the book Challenges and Solutions for Climate Change (Green Energy and Technology). You never really feel lose out for everything if you read some books.

Dennis Bryant:

This book untitled Challenges and Solutions for Climate Change (Green Energy and Technology) to be one of several books in which best seller in this year, this is because when you read this e-book you can get a lot of benefit upon it. You will easily to buy this kind of book in the book retailer or you can order it by way of online. The publisher of this book sells the e-book too. It makes you easier to read this book, as you can read this book in your Smartphone. So there is no reason for your requirements to past this reserve from your list.

Pierre Winter:

Reading a book to be new life style in this yr; every people loves to learn a book. When you examine a book you can get a large amount of benefit. When you read guides, you can improve your knowledge, since book has a lot of information upon it. The information that you will get depend on what types of book that you have read. If you wish to get information about your review, you can read education books, but if you want to entertain yourself look for a fiction books, such us novel, comics, as well as soon. The Challenges and Solutions for Climate Change (Green Energy and Technology) offer you a new experience in reading a book.

Alicia Romero:

You can get this Challenges and Solutions for Climate Change (Green Energy and Technology) by check out the bookstore or Mall. Merely viewing or reviewing it could to be your solve difficulty if you get difficulties for ones knowledge. Kinds of this publication are various. Not only through written or printed and also can you enjoy this book by means of e-book. In the modern era like now, you just looking by your mobile phone and searching what your problem. Right now, choose your current ways to get more information about your book. It is most important to arrange you to ultimately make your knowledge are still up-date. Let's try to choose appropriate ways for you.
