Statistics: A First Course

Donald H. Sanders, Robert K. Smidt

Statistics: A First Course Donald H. Sanders, Robert K. Smidt

The main difference between this text and many others is that an attempt is made here to present material in a rather relaxed and informal way without omitting important concepts. The text demonstrates the wide range of relevant issues and questions that can be addressed with the help of statistical analysis techniques by presenting over 1,750 realistic problems that arise often in health care, the social and physical sciences, education, business and economics, engineering, and leisure activities. It also convinces your students that statistics is "do-able" by including real data that students have collected and analyzed for class assignments and projects. Additionally, the text utilizes an intuitive, common sense approach (including occasional humorous situation or ridiculous name) to develop concepts whenever possible. *Statistics: A First Course* employs widely available, inexpensive technologies--particularly Minitab and the TI-83 graphing calculator. We also explore the use of the World Wide Web to collect data, providing students with the means to obtain up-to-date information without leaving their desks.

In short this book is written to communicate with students rather than to lecture to them, and its intent is to convince readers that the study of statistics can be a lively, interesting, and rewarding experience!

Wanda Davis:

This Statistics: A First Course is great reserve for you because the content which is full of information for you who have always deal with world and get to make decision every minute. That book reveal it data accurately using great organize word or we can say no rambling sentences included. So if you are read that hurriedly you can have whole details in it. Doesn't mean it only gives you straight forward sentences but hard core information with lovely delivering sentences. Having Statistics: A First Course in your hand like finding the world in your arm, info in it is not ridiculous 1. We can say that no reserve that offer you world with ten or fifteen moment right but this publication already do that. So , this is good reading book. Hey there Mr. and Mrs. stressful do you still doubt this?

Patricia Gagliano:

You are able to spend your free time to see this book this publication. This Statistics: A First Course is simple to deliver you can read it in the playground, in the beach, train as well as soon. If you did not get much space to bring often the printed book, you can buy often the e-book. It is make you much easier to read it. You can save often the book in your smart phone. Thus there are a lot of benefits that you will get when one buys this book.
