Few issues have revealed deeper divisions in our society than the debate between creationism and evolution, between religion and science. Yet from the fray, Reverend Michael Dowd has emerged as a reconciler, finding faith strengthened by the power of reason.

With evidence from contemporary astrophysics, geology, biology, anthropology, and evolutionary psychology, *Thank God for Evolution* lays out a compelling argument for how religion and science can be mutually enriching forces in our lives.

Praised by Nobel laureates in the scientific community and religious leaders alike, *Thank God for Evolution* will expand the horizon of what is possible for self, for relationships, and for our world.
