We start out in the fifth grade workbook *Fractions: Multiply and Divide* by simplifying fractions. Since this process is the opposite of making equivalent fractions, it should be relatively simple for students to understand. We also use the same visual model as we would for making equivalent fractions, just backwards: The pie pieces are joined together instead of split apart.

Next comes multiplying a fraction by a whole number. Since this can be solved by repeated addition, it is not a difficult concept at all.

Multiplying a fraction by a fraction is first explained as taking a certain part of a fraction, in order to teach the concept. After that, students are shown the usual shortcut for the multiplication of fractions.

Simplifying before multiplying is a process that is not absolutely necessary for fifth graders. I have included it here because it prepares students for the same process in future algebra studies and because it makes fraction multiplication easier. I have also tried to include explanations of *why* we are allowed to simplify before multiplying. These explanations are actually *proofs*. I feel it is a great advantage for students to get used to mathematical reasoning and proof methods well before they start high school geometry.

Then, we find the area of a rectangle with fractional side lengths, and show that the area is the same as it would be found by multiplying the side lengths. Students multiply fractional side lengths to find areas of rectangles, and represent fraction products as rectangular areas.

Students also multiply mixed numbers, and study how multiplication can be seen as resizing or scaling. This means, for example, that the multiplication $(2/3) \times 18$ km can be thought of as finding two-thirds of 18 km.

Next, we study division of fractions in special cases. The first one is seeing fractions *as* divisions; in other words recognizing that $5/3$ is the same as $5 \div 3$. This of course gives us a means of dividing whole numbers and getting fractional answers (for example, $20 \div 6 = 3 \frac{2}{6}$).

Then students encounter sharing divisions with fractions. For example, if two people share equally $4/5$ of a pizza, how much will each person get? This is represented by the division $(4/5) \div 2 = 2/5$. Another case we study is dividing unit fractions by whole numbers (such as $(1/2) \div 4$).

We also divide whole numbers by unit fractions, such as $6 \div (1/3)$. Students will solve these thinking how many times the divisor “fits into” the dividend.

The last lesson is an introduction to ratios, and is optional. Ratios will be studied a lot in 6th and 7th grade, especially in connection with proportions. We are laying the groundwork for that here.

From reader reviews:

Jennifer Bell:

The book Fractions: Multiply and Divide Workbook make one feel enjoy for your spare time. You should use to make your capable considerably more increase. Book can to get your best friend when you getting pressure or having big problem with your subject. If you can make examining a book Fractions: Multiply and Divide Workbook for being your habit, you can get considerably more advantages, like add your personal capable, increase your knowledge about some or all subjects. You may know everything if you like start and read a e-book Fractions: Multiply and Divide Workbook. Kinds of book are a lot of. It means that, science guide or encyclopedia or other people. So , how do you think about this reserve?

Janice Delarosa:

The e-book untitled Fractions: Multiply and Divide Workbook is the reserve that recommended to you to learn. You can see the quality of the reserve content that will be shown to an individual. The language that creator use to explained their ideas are easily to understand. The author was did a lot of exploration when write the book, and so the information that they share to you is absolutely accurate. You also can get the e-book of Fractions: Multiply and Divide Workbook from the publisher to make you far more enjoy free time.

Wendy Clark:

This Fractions: Multiply and Divide Workbook is brand-new way for you who has intense curiosity to look for some information given it relief your hunger of information. Getting deeper you upon it getting knowledge more you know or you who still having little bit of digest in reading this Fractions: Multiply and Divide Workbook can be the light food for yourself because the information inside this specific book is easy to get simply by anyone. These books acquire itself in the form which can be reachable by anyone, yep I mean in the e-book type. People who think that in book form make them feel sleepy even dizzy this publication is the answer. So there is not any in reading a reserve especially this one. You can find actually looking for. It should be here for you actually. So , don't miss that! Just read this e-book style for your better life in addition to knowledge.

Lena Stubbs:

Publication is one of source of expertise. We can add our expertise from it. Not only for students but native or citizen will need book to know the upgrade information of year to help year. As we know those ebooks have many advantages. Beside all of us add our knowledge, can bring us to around the world. By the book Fractions: Multiply and Divide Workbook we can take more advantage. Don't you to be creative people? To become creative person must want to read a book. Simply choose the best book that acceptable with your aim. Don't end up being doubt to change your life with that book Fractions: Multiply and Divide Workbook. You can more desirable than now.
