**Geometry of Algebraic Curves: Volume I (Grundlehren der mathematischen Wissenschaften)** Enrico Arbarello, Maurizio Cornalba, Phillip Griffiths, Joseph Daniel Harris

In recent years there has been enormous activity in the theory of algebraic curves. Many long-standing problems have been solved using the general techniques developed in algebraic geometry during the 1950's and 1960's. Additionally, unexpected and deep connections between algebraic curves and differential equations have been uncovered, and these in turn shed light on other classical problems in curve theory. It seems fair to say that the theory of algebraic curves looks completely different now from how it appeared 15 years ago; in particular, our current state of knowledge represents a significant advance beyond the legacy left by the classical geometers such as Noether, Castelnuovo, Enriques, and Severi. These books give a presentation of one of the central areas of this recent activity; namely, the study of linear series on both a fixed curve (Volume I) and on a variable curve (Volume II). Our goal is to give a comprehensive and self-contained account of the extrinsic geometry of algebraic curves, which in our opinion constitutes the main geometric core of the recent advances in curve theory. Along the way we shall, of course, discuss applications of the theory of linear series to a number of classical topics (e.g., the geometry of the Riemann theta divisor) as well as to some of the current research (e.g., the Kodaira dimension of the moduli space of curves).

**From reader reviews:**

**Marie Aultman:**

Why don't make it to be your habit? Right now, try to ready your time to do the important act, like looking for your favorite reserve and reading a book. Beside you can solve your long lasting problem; you can add your knowledge by the e-book entitled Geometry of Algebraic Curves: Volume I (Grundlehren der mathematischen Wissenschaften). Try to make the book Geometry of Algebraic Curves: Volume I (Grundlehren der mathematischen Wissenschaften) as your close friend. It means that it can for being your friend when you really feel alone and beside that of course make you smarter than previously. Yeah, it is very fortunate for you personally. The book makes you a lot more confidence because you can know every thing by the book. So , we should make new experience along with knowledge with this book.

**Lois Maestas:**

This Geometry of Algebraic Curves: Volume I (Grundlehren der mathematischen Wissenschaften) book is just not ordinary book, you have after that it the world is in your hands. The benefit you obtain by reading this book is information inside this reserve incredible fresh, you will get data which is getting deeper anyone read a lot of information you will get. This specific Geometry of Algebraic Curves: Volume I (Grundlehren der mathematischen Wissenschaften) without we recognize teach the one who studying it become critical in contemplating and analyzing. Don't be worry Geometry of Algebraic Curves: Volume I (Grundlehren der mathematischen Wissenschaften) can bring when you are and not make your bag space or bookshelves' turn out to be full because you can have it in your lovely laptop even mobile phone. This Geometry of Algebraic Curves: Volume I (Grundlehren der mathematischen Wissenschaften) having great arrangement in word and layout, so you will not sense uninterested in reading.

**Jennifer Nava:**

Exactly why? Because this Geometry of Algebraic Curves: Volume I (Grundlehren der mathematischen Wissenschaften) is an unordinary book that the inside of the guide waiting for you to snap the item but latter it will shock you with the secret the item inside. Reading this book close to it was fantastic author who all write the book in such amazing way makes the content within easier to understand, entertaining way but still convey the meaning completely. So , it is good for you because of not hesitating having this ever again or you going to regret it. This amazing book will give you a lot of advantages than the other book have got such as help improving your ability and your critical thinking method. So , still want to hold off having that book? If I had been you I will go to the guide store hurriedly.

**Jerri Montgomery:**

Don't be worry should you be afraid that this book will certainly filled the space in your house, you will get it in e-book way, more simple and reachable. This particular Geometry of Algebraic Curves: Volume I

(Grundlehren der mathematischen Wissenschaften) can give you a lot of friends because by you looking at this one book you have factor that they don't and make a person more like an interesting person. This particular book can be one of one step for you to get success. This e-book offer you information that maybe your friend doesn't know, by knowing more than other make you to be great men and women. So , why hesitate? We should have Geometry of Algebraic Curves: Volume I (Grundlehren der mathematischen Wissenschaften).
