The last few decades have seen a revolution in debates about the rationality of Christian belief. Among the array of current options for justifying religious belief, however, nearly every one assumes that a general theory of knowing and a minimal version of theism must be adopted before the rationality of Christian belief can be tackled.

In *Crossing the Threshold of Divine Revelation* William J. Abraham confronts both of these assumptions, arguing that epistemology must begin with its particular target of inquiry — in Abraham's case the full-blooded "canonical theism" of the early, undivided Christian church. He argues, moreover, that special divine revelation forms a crucial threshold at the entrance to the epistemology of Christian belief. Sure to intrigue philosophers, theologians, and curious students, Abraham's robust vision of Christian faith provides a creative solution to many of the current difficulties in philosophy and theology.
