Blueprints in Obstetrics and Gynecology Tamara L. Callahan, Aaron B. Caughey, Linda J. Heffner

This book is one of five in the Blueprints Series. This title presents the principles of Obstetrics and Gynaecology in a succinct format that complements the structure of the USMLE Step 2 exam. It can be used as a stand-alone text for the Ob/Gyn clinical rotation, or in conjunction with other titles in the series for a comprehensive review for the USMLE Step 2 & 3 exams. The second edition of this book includes 125 clinical vignette style questions at the end of the book. The series format is consistent for all five titles; each title presents short expositions on one of the five key clinical topics.
