Scheffer/Schachtschabel Soil Science Hans-Peter Blume, Gerhard W. Brümmer, Heiner Fleige, Rainer Horn, Ellen Kandeler, Ingrid Kögel-Knabner, Ruben Kretzschmar, Karl Stahr, Berndt-Michael Wilke
The soils are fundamental to our existence, delivering water and nutrients to plants, that feed us. But they are in many ways in danger and their conservation is therefore a most important focus for science, governments and society as a whole.

A team of world recognised researchers have prepared this first English edition based on the 16th European edition.

- The precursors and the processes of soil development
- The physical, biological and chemical properties of soils
- Nutrients and Pollutants
- The various soil classifications with the main focus on the World Reference Base for Soil Resources (WRB)
- The most important soils and soil landscapes of the world
- Soil Evaluation Techniques
- Basic Principles of Soil Conservation

Whoever works with soils needs this book.
