Since breaking up with his high school girlfriend seventeen years ago, Kevin had no idea that he had left something precious behind with her. Now at age thirty-five, his success has brought him everything in life that he might need– all except companionship.

Since his birth seventeen years ago, Andrew and his mother haven't had a very peaceful relationship. Born into a family that couldn't afford him, and haunted him with threats of violence, he hoped and wished for a better life– a life with the father he had never met.

After years of bickering and bitterness, Andrew's mother takes him not only to meet, but live with his long, lost parent. What Andrew expects is a cold shoulder, but what he gets instead is a warm welcome.

Kevin's gentle demeanor and sweet words are all it takes for Andrew to understand the true meaning of what it is to be loved, but something else– something bright and unexpected– blossoms from their growing friendship: a very different kind of love.

Never Mind the Genetics is the first book in the series Double Helix.
