The Multisensory Driver: Implications for Ergonomic Car Interface Design (Human Factors in Road and Rail Transport) Cristy Ho, Charles Spence

Driver inattention has been identified as one of the leading causes for car accidents. The problem of distraction while driving is likely to worsen, partly due to increasingly complex in-car technologies. However, intelligent transport systems are being developed to assist drivers and to ensure a safe road environment. One approach to the design of ergonomic automobile systems is to integrate our understanding of the human information processing systems into the design process. This book aims to further the design of ergonomic multisensory interfaces using research from the fast-growing field of cognitive neuroscience. It focuses on two aspects of driver information-processing in particular: multisensory interactions and the spatial distribution of attention in driving. The Multisensory Driver provides interface design guidelines together with a detailed review of current cognitive neuroscience and behavioural research in multisensory human perception, which will help the development of ergonomic interfaces. The discussion on spatial attention is particularly relevant for car interface designers, but it will also appeal to cognitive psychologists interested in spatial attention and the applications of these theoretical research findings. Giving a detailed description of a cohesive series of psychophysical experiments on multisensory warning signals, conducted in both laboratory and simulator settings, this book provides an approach for those in the engineering discipline who wish to test their systems with human observers.

From reader reviews:

Armando Ceballos:

Have you spare time for the day? What do you do when you have considerably more or little spare time? Yeah, you can choose the suitable activity intended for spend your time. Any person spent their very own spare time to take a walk, shopping, or went to the particular Mall. How about open or perhaps read a book called The Multisensory Driver: Implications for Ergonomic Car Interface Design (Human Factors in Road and Rail Transport)? Maybe it is to get best activity for you. You realize beside you can spend your time together with your favorite's book, you can cleverer than before. Do you agree with the opinion or you have various other opinion?

Ruth Coleman:

The e-book with title The Multisensory Driver: Implications for Ergonomic Car Interface Design (Human Factors in Road and Rail Transport) has lot of information that you can find out it. You can get a lot of help after read this book. This kind of book exist new expertise the information that exist in this reserve represented the condition of the world currently. That is important to yo7u to understand how the improvement of the world. This specific book will bring you within new era of the the positive effect. You can read the e-book on your smart phone, so you can read that anywhere you want.

James Voyles:

The reason? Because this The Multisensory Driver: Implications for Ergonomic Car Interface Design (Human Factors in Road and Rail Transport) is an unordinary book that the inside of the publication waiting for you to snap this but latter it will jolt you with the secret this inside. Reading this book next to it was fantastic author who have write the book in such wonderful way makes the content on the inside easier to understand, entertaining way but still convey the meaning completely. So , it is good for you for not hesitating having this nowadays or you going to regret it. This amazing book will give you a lot of rewards than the other book have such as help improving your talent and your critical thinking means. So , still want to postpone having that book? If I ended up you I will go to the e-book store hurriedly.

Clara Duke:

Don't be worry when you are afraid that this book can filled the space in your house, you might have it in e-book approach, more simple and reachable. This kind of The Multisensory Driver: Implications for Ergonomic Car Interface Design (Human Factors in Road and Rail Transport) can give you a lot of friends because by you looking at this one book you have point that they don't and make anyone more like an interesting person. That book can be one of a step for you to get success. This guide offer you information that probably your friend doesn't learn, by knowing more than other make you to be great people. So , why hesitate? Let's have The Multisensory Driver: Implications for Ergonomic Car Interface Design (Human Factors in Road and Rail Transport).
