"A high-speed thriller. . . . The pages turn rapidly with well-orchestrated suspense." - *The New York Times*

"If Stephen Hawking and Stephen King wrote a novel together, you'd get *The Flicker Men*. Brilliant, disturbing, and beautifully told." -Hugh Howey, *New York Times* bestselling author of the *Wool* series

A quantum physicist shocks the world with a startling experiment, igniting a struggle between science and theology, free will and fate, and antagonizing forces not known to exist

Eric Argus is a washout. His prodigious early work clouded his reputation and strained his sanity. But an old friend gives him another chance, an opportunity to step back into the light.

With three months to produce new research, Eric replicates the paradoxical double-slit experiment to see for himself the mysterious dual nature of light and matter. A simple but unprecedented inference blooms into a staggering discovery about human consciousness and the structure of the universe.

His findings are celebrated and condemned in equal measure. But no one can predict where the truth will lead. And as Eric seeks to understand the unfolding revelations, he must evade shadowy pursuers who believe he knows entirely too much already.
