John M. Kinson

There is A God: How an Atheist Scientist Changed his Mind (God & Science Book 1) John M. Kinson
There is a God: How an Atheist Scientist changed his Mind:

This book presents the questions and answers, thoughts and discussions that occurred in the course of an Atheist Scientist moving from an atheistic world-view to belief in God. Many years of investigation, and an honest and rational appraisal of the scientific and philosophical evidence led him to the conclusion that God does exist.

John (pen-name) is a research scientist with more than 100 publications in the hard-sciences, more than 10 inventions (with patents in various countries), and numerous scientific and technical awards in the course of his scientific career. He has collaborated with and published hard-science research articles with scientists from many of the top research universities in the world. He has been an invited reviewer of articles for several of the top scientific publications in his field.

In this book, he presents a brief history of his journey (intellectually speaking) from Atheism to Theism and ultimately to Christ.

The book is not intended to be a rigorous defense of Theism, nor is it intended to be a rigorous defense of Christianity, but rather the path taken intellectually by one Atheist Scientist to a Theistic Worldview, and ultimately to a commitment to Christ.

For more information:

The description below is from the book “Does Science Point to God? Is there Scientific Evidence for God?” by John M. Kinson.

This book, “Does Science Point to God?” (DSP), is the result of a search by John (an atheist scientist) for ultimate truth. He went through several years of intense questioning of the meaning of life, and of the nature of ultimate reality.

Over a period of time he investigated areas such as

- ?Is there Evidence for God?
- ?Is there Scientific Evidence for God?
- ?Is it Rational to believe in God?
- ?Is it Reasonable to believe in God?

This book (DSP) briefly discusses some of the scientific and philosophical evidence that he came across during his investigation.

In particular, this book (DSP) discusses (a) the origin of the universe, (b) the fine-tuning of the universe, (c) the origin of first life, and (d) the presence of language and information in DNA, in the context of Scientific

Evidence for God.

Many years of investigation, and an honest and rational appraisal of the evidence led him to the conclusion that there indeed is scientific (and philosophical) evidence for the existence of God.
