**Ontologies in Urban Development Projects (Advanced Information and Knowledge Processing)** Gilles Falquet, Claudine Métral, Jacques Teller, Christopher Tweed

Ontologies are increasingly recognized as essential tools in information science. Although the concepts are well understood theoretically, the practical implementation of ontologies remains challenging. In this book, researchers in computer science, information systems, ontology engineering, urban planning and design, civil and building engineering, and architecture present an interdisciplinary study of ontology engineering and its application in urban development projects. The first part of the book introduces the general notion of ontology, describing variations in abstraction level, coverage, and formality. It also discusses the use of ontologies to achieve interoperability, and to represent multiple points of view and multilingualism. This is illustrated with examples from the urban domain. The second part is specific to urban development. It covers spatial and geographical knowledge representation, the creation of urban ontologies from various knowledge sources, the interconnection of urban models and the interaction between standards and domain models. The third part presents case studies of the development of ontologies for urban mobility, urban morphological processes, road systems, and cultural heritage. Other cases report on the use of ontologies to solve urban development problems, in construction business models, building regulations and urban regeneration. It concludes with a discussion of key challenges for the future deployment of ontologies in this domain. This book bridges the gap between urban practitioners and computer scientists. As the essence of most urban projects lies in making connections between worldviews, ontology development has an important role to play, in promoting interoperability between data sources, both formal (urban databases, Building Integrated Models, Geographical Information Systems etc.) and less formal (thesauri, text records, web sources etc.). This volume offers a comprehensive introduction to ontology engineering for urban development. It is essential reading for practitioners and ontology designers working in urban development.

### **From reader reviews:**

#### **Shirley Joy:**

This Ontologies in Urban Development Projects (Advanced Information and Knowledge Processing) tend to be reliable for you who want to certainly be a successful person, why. The reason why of this Ontologies in Urban Development Projects (Advanced Information and Knowledge Processing) can be one of the great books you must have is definitely giving you more than just simple reading food but feed you with information that might be will shock your preceding knowledge. This book will be handy, you can bring it almost everywhere and whenever your conditions in e-book and printed people. Beside that this Ontologies in Urban Development Projects (Advanced Information and Knowledge Processing) giving you an enormous of experience for instance rich vocabulary, giving you trial run of critical thinking that we all know it useful in your day activity. So , let's have it appreciate reading.

#### **Laura Thompson:**

The particular book Ontologies in Urban Development Projects (Advanced Information and Knowledge Processing) has a lot associated with on it. So when you check out this book you can get a lot of help. The book was published by the very famous author. The writer makes some research previous to write this book. This book very easy to read you can find the point easily after scanning this book.

#### **Melinda Gregory:**

In this period globalization it is important to someone to get information. The information will make anyone to understand the condition of the world. The fitness of the world makes the information simpler to share. You can find a lot of referrals to get information example: internet, classifieds, book, and soon. You will observe that now, a lot of publisher that print many kinds of book. The actual book that recommended to you personally is Ontologies in Urban Development Projects (Advanced Information and Knowledge Processing) this publication consist a lot of the information with the condition of this world now. This book was represented how can the world has grown up. The dialect styles that writer use for explain it is easy to understand. Typically the writer made some investigation when he makes this book. This is why this book acceptable all of you.

#### **Elizabeth Black:**

Many people spending their time frame by playing outside using friends, fun activity together with family or just watching TV the entire day. You can have new activity to pay your whole day by reading through a book. Ugh, ya think reading a book will surely hard because you have to use the book everywhere? It okay you can have the e-book, taking everywhere you want in your Cell phone. Like Ontologies in Urban Development Projects (Advanced Information and Knowledge Processing) which is keeping the e-book version. So , why not try out this book? Let's see.
